ABSTRACT

A virtual reality generator having an input module that
receives as input financial information is disclosed.
The virtual reality generator outputs to a display device
5   a virtual reality world generated from the financial
information. The financial information can be pre-
processed by a financial analytic system prior to input
to the virtual reality generator. The financial
information can be received from a data file. The
10 virtual reality generator can dynamically display and
continuously update the virtual reality world. Further,
movement through the virtual reality world can be
simulated.
